

**LEADING
THE WAY WITH
NSF CERTIFIED
JET PUMPS**

Jet Pump Series

DEPENDABLE MODELS FOR EVERY APPLICATION

Goulds Water Technology offers a robust line of Jet Pumps ideal for delivering and boosting water in a variety of applications. Withstanding rigorous testing, these jet pumps provide industry-leading benefits and are backed by over 170 years of dedicated service and support. Rely on a jet pump from Goulds Water Technology for trusted performance right out of the box.

APPLICATIONS: Homes, Cottages, Mobile homes, Farms, Boosting

FEATURES & BENEFITS

NSF 61 CERTIFIED

- Proud to lead the way by delivering jet pumps featuring the NSF 61 certification, ensuring safety when used in drinking water systems.

PRIMING

- Industry-leading priming that's easy and fast, typically within 3 minutes.
- Excellent air-handling ability after the initial priming further allows the pump to re-prime itself.

SERVICEABILITY

- A back pullout design allows for disassembly of pumps for service without disturbing the piping.
- A two compartment motor provides easy access to wiring and components, further helping to simply matching the supply voltage with the motor voltage.

RUST RESISTANCE

- Electrophoretic painting, or e-coating on all cast iron parts reduces rusting inside and out, ensuring a longer life when used in outdoor applications.

PRESSURE SWITCH

- The robust preset pressure switch has been proven to deliver reliability over a long pump life.

DRAIN PLUG

- An accessible drain plug makes winterization easy, allowing for simple drainage of pumps to prevent cracking of impellers and casings due to freezing in the off season.

COMPONENT OPTIONS

- GT models are available with silicon brass impellers and an optional base for added height.

TANK PACKAGES

Pre-configured Jet pump and tank packages are also available.

Packages include combinations of:

Jet Pumps: J+, JRS, JRD

HydroPro Tanks: V15, V45, V60

SPECIFICATIONS

Standard Warranty	12 months from date of installation/18 months from date of manufacture**							

* All models are equipped with an AS4 30-50PSI switch.

** Members of Goulds Professional Dealer Association (GPDA) enjoy an extended warranty of 36 months from installation and 42 months from date of manufacture on all models.

NSF 61 is a certification for products that come into contact with drinking water.

This Standard establishes minimum health effects requirements for the chemical contaminants and impurities that are indirectly imparted to drinking water from products, components, and materials used in drinking water systems.

These requirements are based on the EPA and Health Canada Requirement.
